

WARFIGHTER FABRICATION AXLE HOUSING ORDER FORM

(440)226-9475

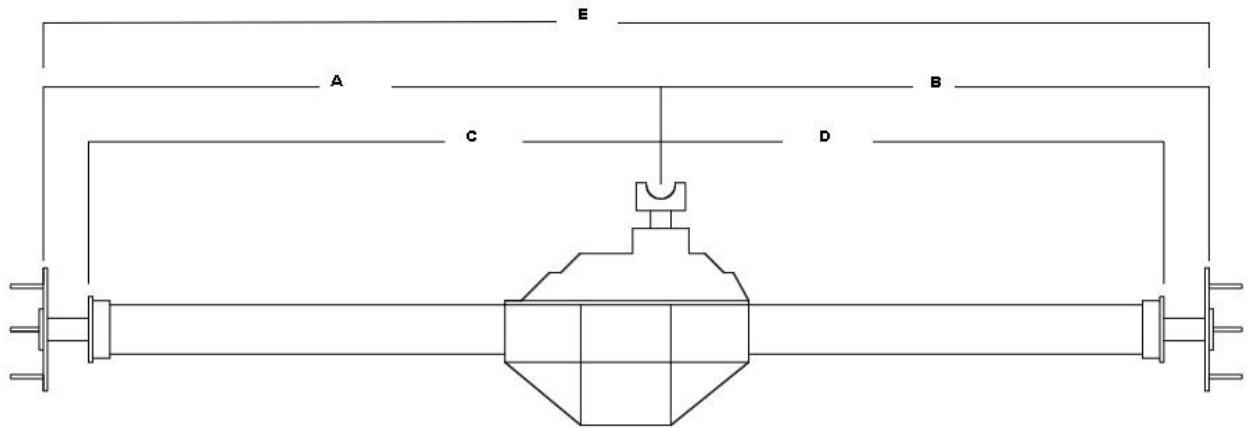

SHAUN@WARFIGHTERFABRICATION.COM

Option 1 is for leaf spring, parallel 4 link and ladder bar.

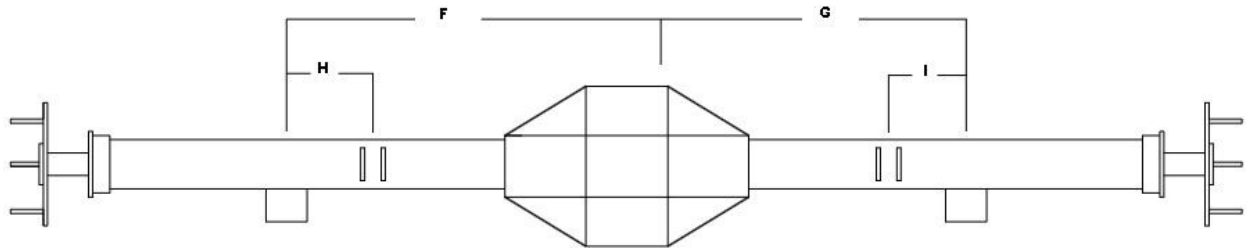

Option 2 is for factory 4 link suspension

If building a new axle without a stock axle to measure off of put the wheels and tires under the car with no axle under the car. Put the wheels where you want them to sit at ride height and measure from the inside of one wheel mating surface to the other for total length. If the pinion is offset in the car draw a line from crank center or output shaft to the rear of the car and measure each side from the line.
